

Preface

These Special Issues brought together by important contributors to stochastic control and filtering celebrate the 65th birthday of Tyrone Duncan, my best friend and colleague with whom I have been sharing family and professional life for almost 25 years.

On behalf of the Guest Editors, I would like to thank the authors for their contributions and the editorial staff of this journal for their assistance and, in particular, the

Editor-in-Chief, Dr. Stephen Yau, for his kind invitation to edit this Special Volume on Stochastic Control and Filtering.

Now, it is my great honor and pleasure to introduce two very special **Guest Editors: Alain Bensoussan** and **Sanjoy Mitter**, close friends and research colleagues through Tyrone's academic career, who graciously agreed to comment on Tyrone's research.
